

Grow where you are.

COMMON GROUND

IMPACT REPORT / ILLUSTRATIVE PROGRAMME

Small actions.
Shared outcomes.

Common Ground is a fictional neighbourhood growing programme. The report demonstrates how a small organisation could explain its activity without turning every number into a claim of impact. Attendance shows participation; it does not, by itself, prove a lasting change.

All programme figures in these pages are sample data.

ACTIVITY ≠ LONG-TERM OUTCOME

What the year involved

24

GROUP SESSIONS

360

ATTENDANCES

Period	Sessions	Attendances
Jan–Jun	12	168
Jul–Dec	12	192
Total	24	360

What we still need to learn

The next review would ask whether people returned, felt able to contribute and took a role in decisions. Those questions need consent, a clear method and a way to report limitations.

Resources used

Simplified sample allocation, in GBP.

Use	Amount
Materials	2,400
Space and equipment	1,800
Facilitation	3,600
Total	7,800

2,400 + 1,800 + 3,600 = 7,800. No donations are being solicited.

Participation needs context.

Impact-report study. Activities and figures are illustrative; no real programme outcomes are claimed.
