

COURTYARD

A STUDY IN QUIET LIVING

A room that works all day.

Good interiors begin with circulation. Leave a clear route between seating, storage and the kitchen. Give the most frequently used furniture the best light, and keep visual clutter away from the window.

Space	Planning allowance
Living zone	18–24 m²
Dining zone	8–12 m²
Storage wall	400–600 mm deep
Clear circulation	900 mm target

Illustrative planning allowances; not an advertised property or a construction specification.

Designed around daily life.

Property brochure study. Photography shows an independently sourced interior; no property availability is implied.
