GRIDSHIFT / PRACTICE PAPER 01

The document is part of the workflow.

A practical framework for clearer internal operating documents.

AUDIENCE

TRIGGER

DECISION

STOP

EDITORIAL & DESIGN / AYOBAMI

A useful document ends in an action.

Start with the decision a reader needs to make. A useful operating document names the task, explains when to use the guidance and gives the reader a clear stopping point.

A polished page cannot compensate for an unclear process. Define the audience before choosing a layout.

Map the decision, write the minimum usable instruction and test it with someone who did not draft it.

This framework is a practice exercise. It makes no claim to measured productivity gains and does not rely on invented research or endorsements.

THE EDITORIAL TEST

Can the reader find the next action without reconstructing the process?

Four questions before writing.

01

Who will use it?

Choose terminology the reader understands. Define what they already know.

02

When will they read it?

Put the trigger near the beginning. State the conditions for use.

03

What must they decide?

Make the options easy to compare. Show the next action for each result.

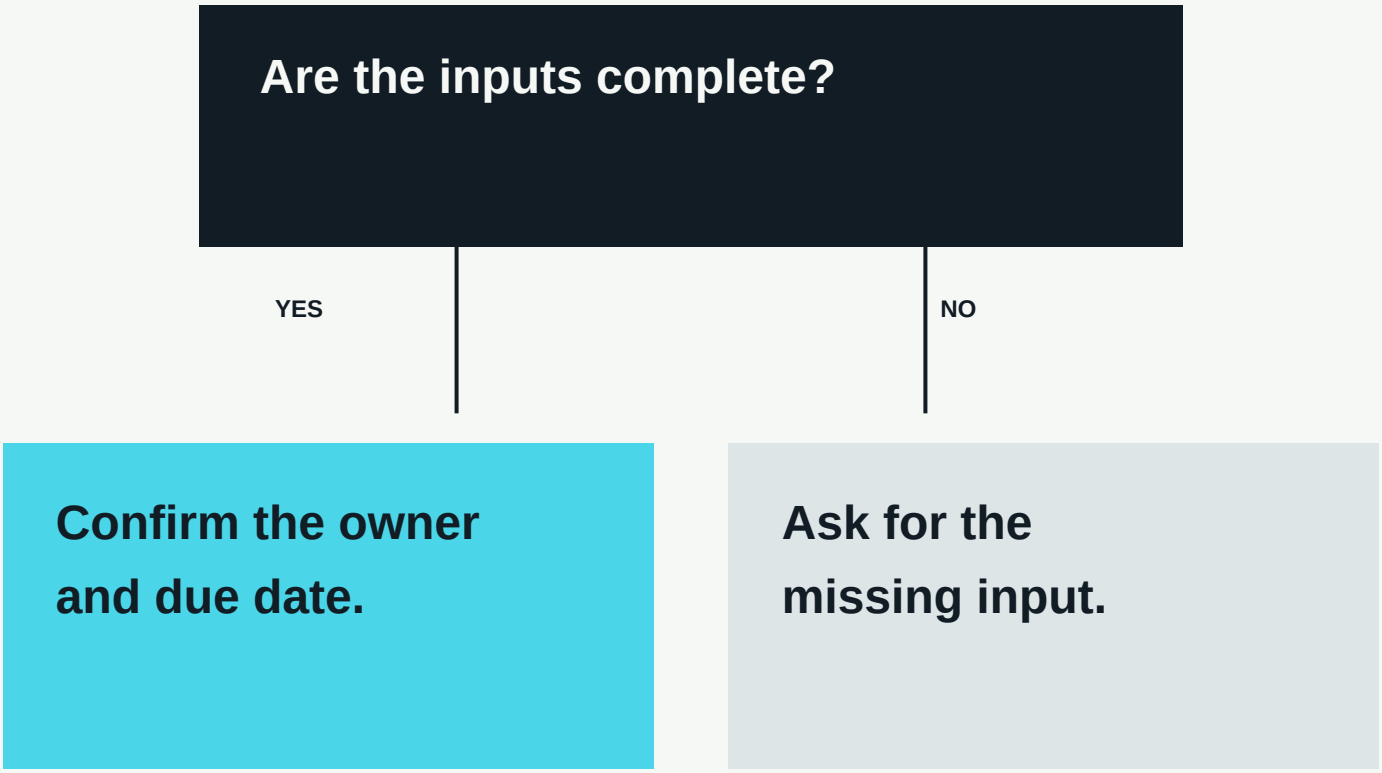

04

Where should they stop?

Name the limit of the instruction. State when to ask the owner for help.

The first page is a working interface.

Example: a work request with incomplete inputs. The drawing models an editorial route; it is not a company procedure.

Keep context beside the decision it affects. A short route is useful only when the conditions are clear.

Test a real task. Record the hesitation.

Ask a reader to locate the relevant section and explain the next action in their own words. Watch where they hesitate. Record the question before changing the layout.

Keep a version note and an owner so correction remains possible.

TASK THE READER TRIED

GRIDSHIFT / PRACTICE PAPER 01

Write for the next decision.

An editorial framework with decision diagrams and a printable review worksheet.

Design and editorial direction: Ayobami. No measured business outcomes or endorsements are claimed.
