ARCHIVE & STREET / MATERIAL LOOKBOOK

CLOTHING, TEXTURE AND DISPLAY

01 The archive as a starting point

A lookbook can document how garments are presented, not only how they are worn. Here, museum display photography becomes a study of silhouette, spacing and the way colour groups create a sequence.

Soft structure

Look closely at the fabric before deciding the crop. Texture needs space to read; a narrow detail can balance a much wider silhouette.

Ways of seeing

01 / Overall shape

A wider view gives context. Keep the edge of the garment or display visible where it explains proportion.

02 / Surface detail

Use a close crop to show the weave and the direction of the material.

A visual sequence

A practical selection checklist.

Choose		Look for
01	**Opening image**	Clear silhouette and space
02	**Detail**	A meaningful texture change
03	**Transition**	A shift in scale or colour
04	**Final image**	A calm visual conclusion

Photography credited in the accompanying source register. This is an editorial study, not a retail collection.

Texture before trend.

An archive-led lookbook with open compositions, tall crops and close material details.
