

PAT TERN

Material

reference

Volume 01

Read the surface

A material catalog needs a consistent way to compare samples. Scale, light and crop affect how a texture reads. Keep those choices stable when a buyer needs to compare one page with another.

This publication is a material-reference study, not a supplier’s inventory.

REFERENCE / T-01

Woven surface

Photographic reference

Colour varies by display

No composition, durability or stock claim is made.

Specification hierarchy

Field	What a live catalog should supply
Reference code	A stable identifier for ordering
Composition	Verified fibre percentages
Width / weight	Measured values and units
Care	Supplier-approved instructions

Circular crop / texture emphasis

Rectangular crop / repeat context

Texture needs a reference.

Material catalog study with editable field labels and deliberate changes in crop and scale.
