NORTHLINE

01

A better visitor guide.

PUBLICATION PROPOSAL / PROJECT BRIEF

Make arrival feel simple.

Create a compact visitor guide for a small exhibition space. The reader needs to understand where to begin, what is available and how to find assistance. Final venue information and approved imagery are required before production.

PROPOSED READER PATH

Begin	Explore	Find help

Success criterion: a first-time visitor can identify the starting point and locate the practical information.

Clear deliverables

Deliverable	Included	Boundary
Guide	8 reader pages	Supplied final copy
Exports	Digital and print PDFs	Printer brief required
Source	INDD and IDML	Linked assets included

A four-stage sequence

Stage	Output	Approval
1 / Content	Content map	Scope confirmed
2 / Direction	Cover and spread	One route chosen
3 / Layout	Complete draft	Corrections supplied
4 / Handover	Final package	Files checked

Before production

The client supplies final copy, approved images, logo files and venue details. Any accessibility or legal requirements should be confirmed before the full layout is built.

Change control

New pages, replacement copy or a new visual direction change the scope. Record the request and agree its effect on timing before revising the document.

Agree the work.
Then begin.

A clear scope, shared responsibilities and a practical programme.

NATIVE ARTWORK / Typography, tables and vector graphics.
